#### **DETAILED ACTION**

#### Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because does not provide Parent Application or PCT Parent Number.

## Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 1, 5-10 are rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility. The invention is inoperative because does not operate to produce the results claimed by the patent application such as the perpetual motion. The connection between the batteries, motor and generator produce a close loop. The batteries provide energy to move the motor, however some of the energy provided by the batteries will change into heat, decreasing the total energy provided by the batteries. The residual energy that get to the motor provide the energy to start said motor in order to move the generator, however friction is created decreasing even more the energy supply from the batteries. The electric energy created by the generator, which is less than the one provided by the batteries, also decreases when is transmitted to the said batteries. Therefore no perpetual motion can be provided by this system

Application/Control Number: 10/772,346

Art Unit: 2834

since energy can not be created or destroyed and also energy has quality as well quantity, and the actual process occurs in the direction of decreasing quality of said energy.

## Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 and 5-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification does not disclose how the machine will provide perpetual motion.

## Claim Objections

Claims 5-10 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only and cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Gaul U.S. Patent No. 3609426.

Gaul disclose an electric motor (65) for providing power and rotating an electric generator (11). The batteries are inherently connected to the electric motor for transmitting electric current.

Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Armfield U.S. Patent No. 4095665.

Armfield discloses a generator (20) for transmitting electric current to two or more batteries (22) to charge the batteries.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yahveh Comas whose telephone number is (571) 272-2020. The examiner can normally be reached on 8am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Darren Schuberg can be reached on 571-272-2044. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
